Key Features

Core Modules

An exhaustive coverage of business functions and workflows, seamlessly integrated in a single solution:
All included in a standard version.

Down-stream sales tracking (CMS)

Leverage live sales data for competitive advantage through the Channel Management System. Your distributors can book orders through the internet and your sales personnel on handheld/mobile devices. (iBEAM-CMS is also available as a standalone cloud solution)

Brand Investment

Budget your entire spend on brand building and marketing, across mediums – from Television and Print to Events. Reconcile your adv-runs across TV channels through upload feature for market (TAM) reports.

Reporting

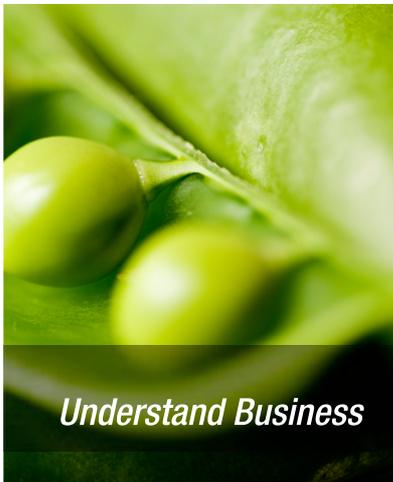

A comprehensive reporting tool for management, and decision analysis; accessible to all your personnel. Also, choose from an exhaustive list of reports developed to meet industry requirements, available across all modules.

The Innosolv Delivery Model

With a decade of experience working closely with Indian business owners/promoters, and implementing technology to help them achieve scale, we understand what works and what doesn't.

When you choose to use iBEAM™, you are not buying a product/ERP that you need to own and manage. You are marking the beginning of a partnership that is committed to making sure technology works for your business, the way you would like it to, everyday.

So from choosing technology that custom-fits your business, implementing it in a short time span, and day to day monitoring thereafter, sign away all your worries to us.

Understand Business

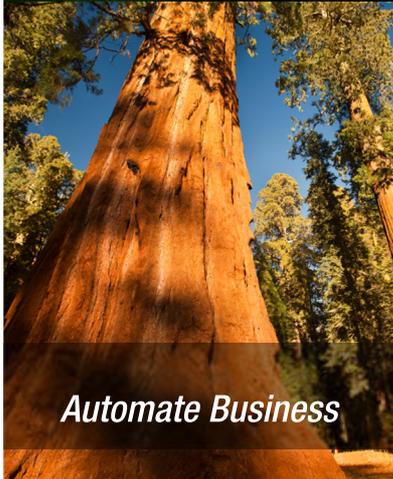

Establish Benchmarks

Adapt Best Practices

Build a stable environment

Automate Business

Secure Visibility and Control

Ensure business Continuity

Create value and trust

State of the art Technology, bundled into one solution!
