## Key Features

## Core Modules

An exhaustive coverage of restaurant functions and workflows, seamlessly integrated in a single solution:  
All included in a standard version.

### iDine Smart

Manage your restaurants/outlets on Hand-held devices/PDAs/Mobiles/Tablets running on Windows or Mac from single or multi-locations.

## The Innosolv Advantage

With a decade of experience working closely with small/medium/large enterprises, and implementing technology to help them achieve scale, we understand what works and what doesn't.

When you choose to use iDINE®, you are not buying a product/ERP that you need to own and manage. You are marking the beginning of a partnership that is committed to making sure technology works for your business, the way you would like it to, everyday.

So from choosing technology that custom-fits your business, implementing it in a short time span, and day to day monitoring thereafter, sign away all your worries to us.

## State of the art Technology, bundled into one solution!

A powerful and robust **Database** to handle businesses of any size.

A **UI (Front end)** that is light enough to run on your existing computers, and easy to connect through even data cards.

**Access security** that guarantees you confidentiality, and peace of mind.

Industry standard **Disaster Recovery and Backup Solution** that ensure last minute back up, and easy restoration; in the case of a rare hardware failure. \*

Zero Investment on **IT Infrastructure and Personnel** \*

*\*Only on the Innosolv Cloud option. Also available on a user-site hosted model.*

Get iDINE® . Get the ability to scale!
